My mum was the most organised person I knew, until recently. She's one of those people whose junk draw looks like a filing cabinet. So it is with great regret that I confess that none of her skills have rubbed off on me. I'd like to think that it is because I'm too busy and have more important things on my mind than plastic storage containers but, the fact is, I've been genetically engineered to be messy. Well, that's what I thought until I met Justine. Brainchild of Domestica, Justine is the most organised person on the planet (sorry Mum). Since my first consultation a couple of weeks ago, Justine has not only reorganised my home (and found numerous pay cheques I never knew existed), she's rewired my brain into believing I can actually be a neat freak. After doing such an amazing job in my kitchen, I've since had Justine back to do over my bathroom and, most importantly, my bedroom, which is now not only free of those tangled wire coathangers but I can also find all those plastic containers my mum once gave me (thanks, Mum).
